

AMENDMENTS TO THE SPECIFICATION

On page 3, amend line 4 as follows:

-- a second layer of rubber (EPM, NBR (Nitrile Butadiene Rubber)) --

On page 4, amend lines 3-9 as follows:

-- It has now been discovered that all these problems can be completely and satisfactorily solved with a rubber sheet structure of the type comprising ~~four~~ two layers of rubber between which a layer of non-deformable cloth or fabric is interposed, said structure being characterized in that the base of the composite sheet is completed with a second layer of cloth or fabric consisting of non-deformable material, which thereby constitutes the outwardly directed surface. The second layer of cloth or fabric also constitutes an outwardly directed surface which is suitable for being in contact with the oven surface. --

Please add the following Abstract:
